

What SAP & the big vendors charge €50,000–€200,000 for — yours from €49/month, running on your own server.

Production-grade business software (secure login, your database, your files) — built, deployed, and managed for small & medium businesses. Built by a SAP architect who knows the trap from the inside.

WHAT YOU GET — THE MODULES YOU NEED

 Repairs & Service Jobs, customers, bays, quotations, invoices — the whole shop floor.	 Point of Sale Checkout, products, cash count, reports, daily close.	 Print Shop Orders, catalog, artworks, suppliers, purchase orders.
 Marketplace & Bookings Listings, events, customers — sell & schedule online.	 Secure Login (RBAC) Keycloak OAuth2, roles per staff member — enterprise-grade.	 Your Data & Files PostgreSQL + object storage — your records, never the vendor's.

THE SAME THING — TWO WORLDS

What	Enterprise (SAP & co.)	HelixNet
Up-front cost	€50,000–€200,000 + yearly licenses	from €490 setup, no licenses
Time to go live	8–16 weeks	days
Change a form field	weeks of tickets	same day
Who owns it	the vendor	you — box, data & code
If you walk away	locked in	keep everything, no lock-in

SIMPLE PRICING

ESSENTIAL €490 setup + €49/mo One module · hosting · updates · backups · email support · your own server	COMPLETE €990 setup + €99/mo Multiple modules + marketplace · priority support · staff roles · training session
--	---

Infrastructure runs for ~€7.59/month. You own the server, the data, and the software — cancel anytime, keep your platform.

Why HelixNet? Built by Angelo Kenel — a SAP PI/PO integration architect who spent years inside enterprise IT and saw the trap: months of meetings, licence ransoms, and six months to change a form field. HelixNet is the way out — the same real tools (Docker, Keycloak, PostgreSQL) without the bureaucracy. Already running for real businesses in Trapani.

Book a **20-minute look**.
No slides, no obligation — the real thing.
